First you need to find the number of visitors on Sunday which is $2,114 - 650 = 1,464$.

Then you need to add Saturday's visitors to that number to solve the problem.

$1,464 + 2,114 = 3,578$

I have used column method, taken one off each number to find the difference and found the difference by counting on. I used counting on the number line.
